

# PALMIERI

Enhancing Educational Spaces  
for Today and Tomorrow.

Today's ever-changing technology impacts the way instructors teach, students learn and how educational environments are designed.

It is important for educational spaces to support diverse teaching methods, incorporate new technologies and engage students effectively through their various learning preferences.

Every space can be a learning space.

From the moment you step into the entrance hall, students and faculty alike can **meet**, **gather** knowledge, **connect** with one another, **share** and **exchange** information as they please.

Let Palmieri be your tour guide through various types of learning spaces and concepts that will enhance your educational environments and enrich the learning experience for students, teachers and faculty.

gather, connect  
& exchange

PODS by Dre

A collection of modular seating designed to expand the functionality of any lounge area. It welcomes rest and work, quiet times and conversations, comfort and style while keeping the power of connectivity within arm's reach. It is suitable for a variety of spaces and can be shaped in multiple configurations.

Check into your Pod, connect with others and experience a stylish power seat!

Hallways, entrances and reception areas have become multi-purpose workspaces. These areas are used by both the student body and faculty for a **quick stop** to **pause**, to gather around and **interact** with each other.

Maximizing the use of your school real estate is the key in today's educational spaces.

Placing the proper materials, tools, technology and furniture in these halls and in-between spaces encourages students to continue their **study**, learning process and makes them comfortable to seek and obtain knowledge from their peers and in all areas of the school.

Learning happens anywhere; before, during and after the classroom.

pause, study & reflect

Today's elementary and high school classrooms are designed to be more interactive and flexible. They must support the transitions between multiple teaching modes: from **lectures**, to group workshops, to tests/examinations, debates and discussions—while keeping the students **engaged** throughout the entire lesson.

configurations, see page 66.

“A modern student’s life is, in many ways dictated and organized by their digital life:  
online, there are secret spaces to **watch** and **observe**;  
group areas to **socialize** and **collaborate**;  
publishing spaces to **share** and **express**;  
performance areas to **play** and **experiment**;  
participation spaces to **work with others** toward a common goal;  
data spaces to **research** and **study**;  
and “watching” spaces to **absorb** and **reflect**.”  
– K-12 Blueprint

An educational space must reflect a student’s life, interests, and abilities.  
In turn, spaces that meet all of their learning needs, methods and support  
their activities may help produce greater academic achievements  
and higher grades.

# school library

# school library floor plan

School libraries have become another venue for students to do **research**, **review** their lessons, work on their group projects and **exercise** what they've learned. Also, teachers learned to utilize the library as an extension of their classroom to change their work setting once in a while and break the mundane lesson plans and activities. As a result, the students become more engaged and stimulated in a new class environment.

study, learn & work

Public libraries, like school libraries, have become more than a place where you read and store books. It is a multi-dimensional space that supports individual zones for private, enclosed work areas, group zones for collaborative studies and both long and short-term use for different user postures. It caters to various **learning**, **studying** behaviors and **work** methods that requires furniture that is flexible, able to meet collaborative, private and ergonomic needs.

study commons

Study rooms are great informal spaces where students can **ponder** about, **examine** and **practice** what they've learned. These rooms can host both individual and group assignments and activities. Teachers may also use these spaces for better class participation, individual mentorship and group assessment.

join, relax & mingle

Lounge areas allows both students and teachers to **mingle** and **join** conversations that build the school community and its relationships. Socializing is another way to learn from their peers and develop their communication skills.

Lounge spaces must have soft, light-weight, modular and power-ready seating that can accommodate to both short and long-term usage and ergonomic postures. This can also serve as a multi-purpose lounge where the students and faculty can have their casual meetings.

discover, innovate  
& evaluate

S.T.E.A.M. rooms provide students and teachers a functional space to work on technical subjects like Science, Tech, Engineering, Arts & Math. These spaces allow one to harness their computing, **innovative, evaluating** skills and artistic abilities.

This type of space must have the adaptability to transition from formal to informal teaching and learning methods and back again. Soft and mobile seating with casters can provide a healthy studying posture and movement for both short and long-term use.

sit-downs

access, transfer & produce

Transforming computer labs into robust media labs has been the trend in these type of environments today. A media lab houses advance computer workstations with the latest software and printing devices that students and instructors are given **access** to.

These labs must provide ample workspaces and furniture for both individual tasks and group work that require power, **data-transfer** and wire management. Providing adequate furniture solutions for students to spread their books, laptop and connect their smart devices while they work is very important in their ongoing learning process.

Cafés or cafeterias are more than just **dining** spaces, it's a mix of loud, public and somewhat private and quiet space for students, faculty and guests to socialize in. These spaces provide a very dynamic environment where everyone can **gather** and **connect** with one another. Using proper, ergonomic furniture and layout nurtures the community interaction.

dine-in, gather together  
& connect

café

Faculty and guest rooms are sometimes neglected due to limited funding and space availability. Today's research and studies show, great work environments positively impact and increases employees' productivity. So educational spaces must ensure to include and design areas where the faculty, staff and guests can just **relax**, connect with their peers, mentor each other and some of their students outside the classroom. Sit & stand tables, soft, powered seating and side tables help foster these types of interactions.

Educational spaces are effective when it helps educators capture their student's interest, learning preferences and achieve their full potential.

Create learning spaces that are:

- **Formal and Informal:** For both traditional and modern ways of teaching and learning
- **Private and Public:** For individual tasks and group work assignments
- **Adaptable:** Configurable according to various teaching methods and learning styles
- **Resourceful:** Quality furniture solutions integrated with the latest technology
- **Stimulating:** Engages all types of learners, igniting creativity, inquiry and exploration
- **Safe:** Promotes overall physical well-being and healthy movement for everyone
- **Social:** Supports interaction and collaboration throughout the whole community

Design your educational environments with these qualities in mind and **enrich** the learning experience for **everyone**.

Enhance your space with Palmieri's furniture solutions today and tomorrow!

## Statements of Assurance

For nearly 50 years, Palmieri Furniture has been designing and manufacturing innovative furniture of exceptional quality for libraries, schools, corporations and other public spaces. Our unique, modern and dependable tables, services desks, collaborative workstations, displays, carrels, modular seating, mobile storage and shelving can be found in the finest educational facilities across North America. We pride ourselves in our dedication to use the latest technology to bring our valued customers the utmost quality products, on-time delivery, excellent customer service and complete customer satisfaction. We look forward to working with you in creating your perfect furniture experience!

### ENVIRONMENTAL STANDARDS & CERTIFICATIONS

Palmieri is conscious of the impact that our products have on the environment. Our objective is to offer products that support responsible forest management and conservation. We are committed and proud to be among the select few that can offer environmentally-responsible alternatives to designers, architects and engineers with LEED certification. We strive and continue to meet the demands of our customers, while improving and sustaining our business operations that are safe, socially and environmentally friendly. For more information about environmental policies and procedures, please visit our website: [www.palmierifurniture.com](http://www.palmierifurniture.com) or simply contact us at **1-800-413-4440** or e-mail [info@palmierifurniture.com](mailto:info@palmierifurniture.com).
