IN STOCK

ON ORDER

**EZSwipe® RFID KAN-BAN ENSURES SUPPLIES ARE ALWAYS ON HAND & STOCK LEVELS ARE EXTREMELY ACCURATE**

When the front bin is depleted, a simple motion of moving a sliding mechanism attached to the storage bin left-to-right sends an RFID signal to materials management that supply needs to be restocked. It's that simple to save costs and optimize patient care!

RFID antenna receives responses from uncovered tags

Antenna sends data to a connected RFID reader

RFID reader transmits the data to Pegasus software in the cloud

**THE PEGASUS RFID SYSTEM ONLY REQUIRES A SINGLE LAN CONNECTION AND POWER SOURCE**

**WORKFLOW**

[1] Fully stocked basket

[2] Consumption starts from front bin

[3] Slider will be moved to the right when last item is consumed

[4] Consumption continues from back bin

[5] Replenishment & rotation of remaining stock
