

LABORATORY SOLUTIONS
Modular / Ergonomic Productivity

Modular Millwork®
Sustainable Workflow Designs

MOD•U•LAR [moj-uh-ler] A design approach that subdivides a system into interchangeable parts for easy construction and flexible configuring ... and unlimited re-configuring.

THE FLEXIBLE LAB SOLUTION.

Ordinary casework is not designed to address the ever-changing demands of the modern lab. With a Modular Millwork solution, change is easy so you can adapt to evolving technology, workflow and chemistry for ongoing productivity.

BASIC WORKSTATION
Select reagent shelves and chemical resistant work surfaces with storage base for functional utility.

MOBILE PRODUCTIVITY
Add Catalyst workflow organizers and casters to enhance any station.

MODULAR MILLWORK IS EASY TO RECONFIGURE AND RE-PURPOSE FOR ONGOING PRODUCTIVITY.

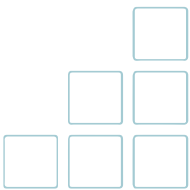

CONTROL CENTER
Select a laminate work surface, monitor rail and work shelf for a process control center.

WET LAB
Add a solid surface counter, splash wall and drainboard to create a new wash station.

DID YOU KNOW?
Modular Millwork's unique structural frame design is load-rated at 1,000-pounds per workbench.

WELCOME TO THE FUTURE OF WORKSTATION PRODUCTIVITY.

CATALYST WORK RAILS are easily added to any workstation to allow vertical organization for superior ergonomics and accelerated productivity.

TASK LIGHTS improve visibility and illuminate your productivity. Choose articulated or under-shelf options.

360° SWIVEL SHELF declutters your workspace while allowing dual-sided access to critical information.

HEAVY DUTY WORKSHELVES can be positioned anywhere on either side of the work rail to organize reagents, supplies and equipment.

TABLET HOLDER with telescoping quick-release positions data for optimal viewing and access.

DISPENSER BINS so tissues, gloves, supplies, pharmaceuticals, sharps, labels and critical inventory can be placed anywhere on either side of your work rail.

SOLID BRASS FIXTURES allow you to locate wet utilities where needed. Select chemical resistant epoxy, stainless, polypro or solid surface sinks.

MONITOR & KEYBOARD HOLDERS position technology for optimal viewing and access. Choose from a range of fully articulated mechanical or gas-assist arms.

WORK SURFACE options include chemical resistant epoxy or phenolic, stainless steel, maple, laminate, solid surface, polypro (HDPE) or bactericidal (germ killing).

SIDE-CHASE DOORS give instant access to the core chase to enable easy workstation updates and utility connections.

EASY ACCESS UTILITY CHASE lets you update and change lab equipment and technology by simply unlatching the hinged access panels.

PULL-OUT SHELF provides extra counter space on-demand.

HEAVY-DUTY FULL EXTENSION DRAWERS with high-impact resistant 3 mm edges - perfect for active labs (100 lb load rated).

DESIGNER PULLS & DUAL SIDED LAMINATES add a stylish touch.

STRUCTURAL FRAME with powder paint finish is load rated at 1,000 lbs. per cabinet to support heavy lab equipment and chemistry.

DID YOU KNOW?

Every workstation is mobile ready. Simply remove the leveler glides and insert our heavy-duty casters (250 lb. load rating per caster).

ENABLING
WORLD CLASS
PRODUCTIVITY
AT THE BLOOD
CONNECTION
FOR DECADES.

The Blood Connection implemented the Modular Millwork system for their new 20,000 square foot biologics facility in 2006 and remain at the forefront of their industry today. They are constantly updating technology and reconfiguring labs to improve throughput and maintain leadership in the immunohematology sciences to provide safe, transfusable human blood products to hospital clients across the southeastern United States.

Whether introducing Leuco filtering technologies, advanced microlab chemistry, 100% Zika testing or any host of non-stop innovation, they simply reconfigure their Modular Millwork to enable progress. Most updates are accomplished overnight to minimize downtime in their 24/7 facility.

KNOWN FOR QUALITY.

Modular Millwork is engineered to last. High impact-resistant edges, lifetime warranted hinges and the modular structural integrity of our cabinetry are only the beginning of the superior quality you receive.

PRECISION-WELDED FURNITURE STEEL FRAMES (12 gauge) mean heavy equipment is safe and secure.

JOSEPH BLUM HINGES are rated at 100,000 cycles and are lifetime warranted.

DUAL-SIDED LAMINATES with high impact-resistant 3 mm edges provide aesthetic durability and style.

DESIGNER HARDWARE tastefully finishes your lab without compromising functionality.

INTEGRATED UTILITY MANAGEMENT

Modular Millwork’s integral chase design lets you compress lab construction, updates and occupancy time and saves substantial time and money. You no longer have to trench floors and demo walls to distribute utilities. Simply configure your lab as desired and distribute utilities wherever needed via the integrated chase.

ISLAND CHASE
Enjoy easy access to utilities inside stations via the hinged access doors.

CABINET CHASE
Access utilities anywhere inside via hinged panels behind doors and in knee spaces.

DID YOU KNOW?
With zero added cost or design modifications, our base cabinets are easily anchored to comply with seismic code requirements.

DID YOU KNOW?
Even an 800 lb. test oven is easily supported by the structural frame.

THERE IS NOTHING RUN-OF-THE-MILL WITH MODULAR MILLWORK.

Imagine the laboratory you really want. Now, let's build it.

Our unique modular design and designer finishes let you have the specific functional layout you need for efficiency and the look you want to complement your professional workspace - with no custom upcharges. You no longer have to sacrifice design for functionality. Get the lab you need with the look you want – at the cost of ordinary casework.

RECONFIGURE
YOUR LAB IN A
MATTER OF HOURS

YOUR LAB CAN HAVE PERSONALITY TOO.

Whether you want a sleek, stainless steel workstation or designer color laminate - you shouldn't have to sacrifice style for functionality. With Modular Millwork, you can get the best of both worlds.

DID YOU KNOW?

We embrace green practices and are LEED compliant.

THE MODULAR SYSTEM FOR LABS.

Whether you need a new biologics processing facility, Core Lab for your hospital, STEM lab for your school, metallurgical lab, product or environmental QA test lab – Modular Millwork has the perfect solution for your lab to enable ongoing innovation and progress. Plus, our industry leading ship times let you implement your laboratory solution in record time.

EXPERT ASSISTANCE WITH YOU EVERY STEP.

Our team is here to provide total project management support for you. From initial design development to individual workstation programming and complete installation of your new lab, we are with you every step of the way to achieve the lab productivity you seek. Call us today to discover the Modular Millwork system for your future.
