Hand Sanitizer Station

Maxon offers you an easily accessible sanitizing station that helps employees stay bacteria free while on-the-go. Include this station throughout your facilities in high traffic areas for a quick way to fight germs between meetings.

Mounting Specifications

Product Description:

- Free standing
- Stand is compatible with most manufacturers' standard hand sanitizer dispensers
- Available in all Maxon standard paint options
- No assembly required
- Metal base for added stability
- Dispenser sold separately

Primary Area of Use:

- High traffic areas
- Meeting rooms, lobbies and restrooms
- Medical clinics

Easy Installation:

- Dispensers can be attached through the pre-drilled holes or via double-sided tape
- Additional mounting holes can be drilled to fit a non-standard dispenser

Product Specifications:

- 12"W x 16"D x 54"H
- Ship weight 15 lb., 6.1 Cube
- Overall Mounting Plate Size = 15"H x 6"W with 4" drip tray

Table Screens

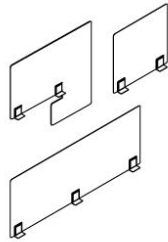

Maxon universal table-mount screens offer a cleanable, easily-retrofitted solution to create boundaries within the workplace. Offered in 20"H and 25"H, metal screens offer users a sense of privacy while also providing a customizable space to tack photos and reminders up with magnets or jot down notes with the optional markerboard finish. Extended lateral screens offer an additional 12" boundary in-between users.

Metal Screen

Brackets

Metal & Acrylic Table Screens

- Screens are offered as extended lateral (for 24" or 30"D work surfaces), lateral (for 24", 30", or 36"D surfaces), or table-mount configurations (for 48" through 66"W work surfaces).
- Screen depths are undersized to accommodate Maxon work surface depths but can also be added to panel system or tables product.
- Brackets attach to the top of the worksurface using an industrial grade adhesive. Installation does not require any sort of drilling or defacing of the work surface. Screens and brackets may be removed in the future, if desired.
- Front of the bracket has a beveled zinc cap, back of the bracket has exposed hardware. Brackets are nonhanded so that the front and back can be oriented either direction, based on the given application.
- Screens meet or exceed ANSI/BIFMA X5.5-2014 Sections 4.6 and 9.
