Adept task and guest chairs in Contourett Vinyl upholstery

## Material Cleaning

**COVID-19 Disinfection:** For disinfecting hard surfaces against the COVID-19 virus the CDC recommends using diluted household bleach solutions (minimum 1/3 cup of bleach for every gallon of water, or a 2% bleach solution) or isopropyl alcohol solution (minimum 70% isopropyl). Concentrations for bleach disinfecting solutions for mesh are noted below and for specific textiles, on page 2 of this document.

Cleaning Instructions for Hard Surfaces and Textiles: Leave cleaning solution on for at least 30 seconds but no longer than 2 minutes.

Thoroughly remove the solution from the surface with a clean cloth and warm water.

May cause discoloration if left on the surface longer than suggested time or not removed after sanitizing.

**The following surface materials can be cleaned in this manner:**

Powder Coated Metal  
Painted MDF  
HPL  
TFL  
Edgeband  
T-mold  
Glass  
Plastics
